

# First International Conference of Biomedical Research and Treatment for Autism

**Daniela Man** is a book author, blogger, a therapist authorized for complementary therapies, nutrition, diet, lifestyle, member of the Union of Complementary Medicine Alternatives and Alternative Medicine in Romania and nutritionist specialized in the Specific Carbohydrate Diet.

After diagnosing her child with autism, Daniela has devoted herself to studying alternative methods of treatment and has managed to help her own child overcome his serious health condition and regain his language by implementing this specific diet and various complementary therapies.

Besides extraordinary results with her own child, Daniela has brought great results to the lives of many people, results that you can read about on her personal blog [www.acasaladaniela.ro](http://www.acasaladaniela.ro) and today she offers consultations for mothers from all over the world. She published a book named "Introduction to the Specific Carbohydrate Diet" that contains scientific explanations, practical applications and recipes specifically created for children diagnosed with TSA as well as for those suffering from various autoimmune diseases and already supports many families in their struggle for a decent life.

In October 2017, Daniela began working with Dr. Kendal Stewart, a world-renowned specialist in biochemistry, neuro-immunology and neuro-otology, founder of NeuroSensory Centers of America, Inc. (NSCA).

At the same time, Daniela set up the Saved Generation Association through which she wants to gather the necessary levers for families who need support in their struggle with the effects of autistic spectrum disorders.

**Doctor William Shaw** Ph.D., received his Ph.D. in biochemistry and human physiology from the Medical University of South Carolina and is board certified in clinical chemistry and toxicology. Dr. Shaw has supervised large endocrinology, nutritional biochemistry, toxicology, and immunology departments in positions at the Centers for Disease Control (CDC) and Smith Kline Laboratories. As the Director of The Great Plains Laboratory, Inc. in Lenexa, Kansas, he specializes in providing diagnostic tools aiding in the diagnosis and treatment of mental health disorders, mitochondrial disorders, neurological diseases, chronic health issues, and immune diseases.

**Doctor Heinz Reinwald** is an experienced Specialist in Alternative Medicine and has developed his own metabolic program. He is the Managing Director of the dr. reinwald healthcare company, runs a clinic in Nuremberg, Germany, and is the author of numerous books and articles as well as the Founder and Director of dr. reinwald& partner academy for research, congresses and training in novel therapies, especially in cancer and neurological disorders. He also works as an international speaker on all aspects of the topic Health and Nutrition as a supportive treatment for Chronic Diseases. The focus of his professional practice and research primarily concerns biological anti-tumor therapy, neurological disorders like ASD and AD, and immunotherapy as well as issues in nutritional medicine.

**Doctor Marco Ruggiero** was born in Firenze, Italy in 1956. He graduated from the School of Medicine, in 1980. He has a PhD in Molecular Biology and a specialization in Diagnostic Radiology. He served in the Army as Medical Officer. In 1984-1986 he worked at the Laboratory of Cellular and Molecular Biology of

Burroughs Wellcome Co, where he published a paper in PNAS sponsored by Nobel Laureate Sir John Vane. He worked at the National Cancer Institute of the National Institutes of Health in Bethesda, MD, where he performed research on oncogenes and signal transduction. He returned to Italy as Professor of Molecular Biology at the University of Firenze until his retirement in 2014. He moved to Arizona in 2015.

Together with his wife Dr. Stefania Pacini, he is the inventor of the probiotic yogurt "Bravo", and its derivatives. Marco Ruggiero has invented "Rerum", a powerful, non-protein, Macrophage Activating Factor (MAF) and has developed the Ruggiero-Klinghardt Protocol. In 2017, Marco Ruggiero developed a method to enhance efficacy of DNA vaccines and envisaged the concepts of relativistic time dilation and biological quantum entanglement as they relate to cancer, autism and chronic conditions.

According to a paper of his publishes in 2017, „as we slow down the passing of time at the level of DNA, everything about medicine will be revolutionized. Cells will have time to repair damages to the genome and the epigenome, diseases will be cured from the inside before they manifest themselves, and humans will be entitled to live without aging" (J Neurol Stroke, 2017 7(7): 00263. DOI: 10.15406/jnsk.2017.07.00263).

## Doctor Nicola Antonucci

obtained a specialization in Psychiatry at the University of Bari, Italy in 2005. His daughter was diagnosed with an Autism Spectrum Disorder (ASD) in 2006. It was then that he started training in Biomedical Treatment for

ASD utilizing the support and mentoring from the Autism Research Institute in San Diego.

He is currently director of the "Biomedical Centre for Autism Research and Treatment" in Italy and holds multiple clinics throughout various locations in and around Europe. In 2010, he collaborated with Dr. Dario Siniscalco (Second University of Naples) and together they founded a research group to study molecular and cellular changes in ASD.

This group is currently conducting several research trials on advance treatments for ASD, in collaboration with American and European researchers. They have published several papers in international peer-reviewed journals on this subject.

**Doctor Dario Siniscalco** is biochemist for the Department of Experimental Medicine of the University of Campania, Italy.

He graduated in Chemistry from the University of Naples "Federico II" in 2000 and received his Ph.D. in Pharmacological Sciences from the Second University of Naples in 2004.

He completed his neuropathology fellowship at University of Alabama at Birmingham, USA before joining the Second University of Naples staff in 2006.

He is registered member of the following scientific societies: Order of the Chemists of Campania, National Council for Chemistry, Stem Cell Research Italy, International Association of Neurorestoratology, European Association for Chemical and Molecular Sciences, Italian Pharmacological Society, Cell Death Research Group - University of Alabama at Birmingham, USA.

In 2010, in collaboration with dr. Nicola Antonucci, he founded a research group to study cellular and molecular changes in autism spectrum disorders. Author or co-author of 80 scientific peer-reviewed papers and 10 book chapters. His works received more than 1734 citations so far (h-index 26).

Presented 95 communications/abstracts to national and international conferences. He is serving as an editorial board member and reviewer of more than 40 international journals.

His main research interests: gene expression and molecular regulation in autism spectrum disorders; use of stem cells as therapeutic tool in autism; role of macrophage activation in autism. Other research interests: stem cells therapy for the neuronal recovery; studying of neuronal apoptosis. Role of bcl-2 family, caspases, and cell cycle regulator genes.

He has been nominated as Editor-in-Chief of the international peer-reviewed journal Autism OpenAccess, Omics group. Full publication list is here: <http://orcid.org/0000-0002-3779-2596>

## Brad Mullens

is an Area Account Manager and Corporate Trainer for Genomix Nutrition. He shadows Kendal Stewart, MD in clinic and does individual followup training for their providers worldwide using the genetic testing. Brad Mullens has a BA

in Computer Science and Finance from St. Edwards University in Austin, TX. He is married with four children and resides in Austin, TX.

## Doctor Usman Singh

is director of True Health Medical Center in Naperville, Illinois and owner of Pure Compounding Pharmacy. She has been using evidence based integrative medical interventions to help children diagnosed with ADD, Autism, Allergies, Gastrointestinal issues and related disorders for over 15 years.

She has conducted research involving copper/zinc imbalances, metallothionein dysfunction, biofilm related infections, vitamin D in pregnancy, and hyperbaric oxygen therapy.

She serves on the executive board for the Autism Society of Illinois as well as the scientific advisory board for Generation Rescue and TACA. She is on faculty for MAPs (Medical Academy for Pediatric Special Needs).

## Doctor Haldor Holesch

is a specialist in biophysics and has developed a non-invasive biophysical diagnostic system based on integrative principles. Based on the theory of Dr. Raymond Royal Rife, according to which each cell has its own unique vibrational frequency, Dr. HaldorHolesch has improved the non-invasive method by directly addressing the cause of the manifestations of the disease and not acting only at symptom level.

The identification of imbalances, dysfunctions in the body and the causes of diseases is achieved by detecting frequencies of the human tissue / system affected by the disease, pathogens (bacteria, viruses), intoxications, allergies and food intolerances, but also by detecting associated frequencies of healthy cells.

Dr. Haldor Holesch has completed the initial diagnostics software in over 27 years of experience with over 30,000 frequency values that are individually tested through the Manual Biophysics Assessment and continuously improves this database.

He is the coordinator of the team of specialists of the integrative medicine and health center, Transilvania Healing Center, with the full biophysical evaluation method under his guidance.
